Flexotendon

Product information

Feed supplement to support ligaments, tendons and cartilage

Ligaments, tendons, cartilage and muscles working together are necessary for the horse's flexibility and performance. Ligaments, tendons, joints and muscle all work together for peak flexibility and performance.

Derbymed Flexotendon helps to support tendons and ligaments, and aids the body's self-healing process. **The combination of MSM, Collagen, Bromelain (pineapple), Devil's Claw and Chondroitin Sulfate is recommended in particular in cases of:**

- Sore, inflamed joints or tendons
- Tendon and ligament injury
- Swelling and tenderness

These nutrients promote stability and resilience of joints especially in growing and older, hard working horses.

MSM is an organic sulphur compound, which supports joint and ligament structure by encouraging resilience.

Collagen is an essential component of connective tissue, and helps maintain tendon and ligament strength.

Devil's Claw* can ease discomfort.

Feeding recommendation

- In cases of acute injury or swelling, the daily feeding amount can be increased by 50%
- Supplied with a 30 g measuring spoon
- For best results, give for at least 30 days

Body Weight	Frequency
200 kg	10 g / day
400 kg	20 g / day
600 kg	30 g / day

Keep out of the reach of children.

Store properly closed, in a cool place and protected from sunlight.

Composition:

Collagen 25%, methylsulfonylmethan (MSM) 25 %, dextrose, banana flour, spirulina platensis, pineapple (ground), alga calk, chondroitin sulfate, glucosamin

Ingredients:

Crude protein 29.00 %, crude fat 1.35 %, crude ash 6.10 %, crude fibre 0.60 %, sodium 0.05 %, moisture 23.30 %

Additives per kg:

Nutritional additives:

Vitamin C (3a300) 3,000mg

Sensory additives: Aroma premix (devil's Claw*) 30,000 mg

* Devil's Claw is considered a Controlled Substance by the FEI and so is subject to a withdrawal time in competing animals. Please check all rules relating to prohibited substances for the relevant sport governing body before use.
