Breeding

Digestion

# Gastroquin acute

## Product information

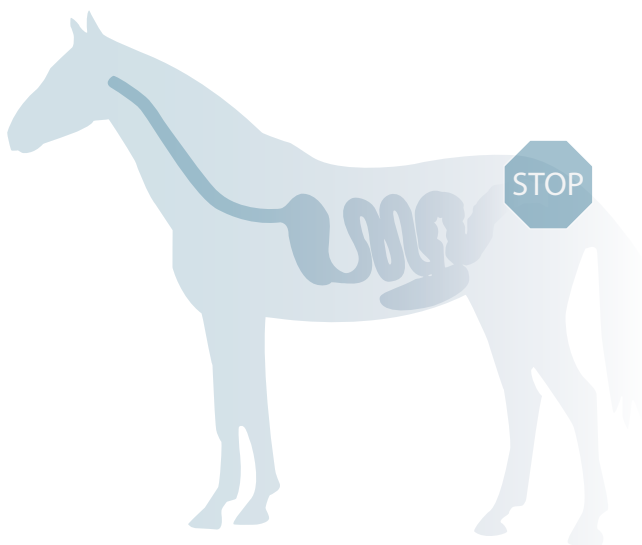

### Feed supplement to stabilize water and electrolyte balance and to stop diarrhea

Gastroquin acute contains a blend of tanning agents, pro- and prebiotics to stabilize the consistency of droppings. Mannans and  $\beta$ -glucans that are contained in yeast bind toxins and stimulate the biological activation of the immune system. The probiotic NCYC Sc 47 and the tannins of the castanea sativa mill cause an improved water resorption inside the colon and a physiological colon flora. Vitamins and electrolytes lost during periods of diarrhoea will be supplemented by Gastroquin acute.

## Feeding recommendations

In the case of digestion problems (diarrhoea) during the first two months of life, foals are given 2 x 15 ml of Gastroquin acute/day. Older foals and adult horses are given up to 4 x 15 ml of Gastroquin acute/day.

**Recommended Feeding Period:** 1–7 days

### Composition:

Herbal oil and fat (sunflower), Dextrose, Yeast Product, Sodium Chloride, Potassium Chloride

### Analytical Constituents:

Crude Protein 3.5 %, Crude Fat 58.6 %, Crude Fibre 0.2 %, Crude Ash 11.5 %, Ash insoluble in hydrochloric acid 4,20 %, Sodium 1.5 %, Potassium 1.3 %, Chlorides 3.5 %

### Additives per kg:

Nutritional Additives: Vitamin E (all rac- $\alpha$ -tocopheryl acetate, 3a 700) 1,000 mg, vitamin B1 as thiamine hydrochloride 400 mg, vitamin B2 as riboflavin-5'-phosphate ester, monosodium salt 400 mg, vitamin B6 (pyridoxine hydrochloride, 3a 831) 100 mg, vitamin B12 as cyanocobalmin 5,000 mcg  
Digestibility Enhancer: 200 x 10<sup>9</sup> cfu/kg saccharomyces cerevisiae NCYC Sc 47 (4b 1702)  
Sensory Additives: Extract from castanea sativa mill 100,000 mg
