

# Myocrescat

## FOR NATURAL MUSCLE BUILDING

CONCENTRATE OF AMINO ACIDS TO STIMULATE MUSCLE GROWTH AND DEVELOPMENT

Protein concentrate  
to build up muscles

Aids performance  
and regeneration

Ideal in cases of  
reduced calorie intake

Convalescence

**Myocrescat**

## Product information

**Feed supplement for horses to build and develop muscle.**

**Myocrescat is a unique formulation containing 18 natural amino acids, L-carnitine and vitamin E.**

Horses need well-developed muscles to be able to perform at the highest level. Muscle mass can make up 40 % of a horse's bodyweight. Myocrescat is rich in amino acids, which are essential for healthy muscle tissue growth.

L-carnitine is very important for the maintenance of muscle function, to optimise energy supply to the muscle cells and to increase oxygen-intake in high-performance horses. Also L-carnitine decreases degenerative processes in the muscle tissue that may occur in older horses or when feed intake is reduced.

**TIP!**

**For the ultimate muscle boost derbymed recommends a combination of Myocrescat and Orysanol.**

## Why Myocrescat?

**Sports- and young horses:** Myocrescat provides all necessary amino acids for sports and young horses. Therefore, it helps to increase muscle growth and stamina.

**Breeding horses:** Myocrescat supplies broodmares with high value amino acids, which are necessary for foetal development.

**Older horses:** Myocrescat decreases muscle breakdown and supports their increased demand for high value amino acids.

**In case of reduced calorie intake:** Myocrescat supplies muscle with necessary amino acids and helps stop muscle breakdown.

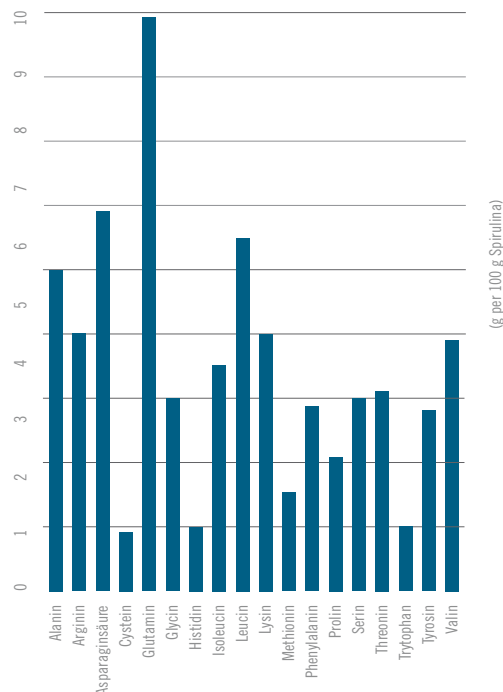

## Feeding recommendations

Body Weight	Amount Medium Work	Amount Hard Work
200 kg	15 g/day	25 g/day
400 kg	25 g/day	50 g/day
600 kg	45 g/day	80 g/day

Myocrescat can be given before or during competition under current FEI rules.\*

\*Please check all rules relating to prohibited substances for the relevant sport governing body before use.

**Spectrum of amino acids contained in Myocrescat**

### Composition:

**Spirulina 45.0 %**, alfalfa meal 25.0 %, linseed expeller 20.0 %, soy oil 3.0 %

### Analytical Constituents:

Crude Protein 40.0 %, crude fat 6.1 %, crude fibre 7.0 %, crude ash 5.0 %, sodium 0.5 %

### Additives per kg:

Nutritional additives: **L-Carnitine 20,000 mg**, vitamin E (all rac- $\alpha$ -Tocopheryl Acetate, 3a 700) **10,000 mg**

Presentation 1.300 g pellets
